

Movement Task

For this task you will pick up the cup from its starting position, move it to the ending position, and then place the cup back on the table in the ending position. **You will have a maximum of 5 minutes to complete the task!** Step by step instructions are shown below:

1) Move the robot arm to the cup.

2) Pick the cup off the table and move it to the other position.

3) Place the cup upright at the other position.
